

KR SAWCUT INOX SPRAY OIL

Product code: INOX SPRAY OIL

Product Description:

INOX SPRAY OIL is a unique blend of solvent refined base oils fortified with high levels of controlled release sulphurised esters and chlorinated extreme pressure additives. INOX SPRAY OIL has been formulated to be noticeably more viscous than conventional ester based spraymist lubricants to provide a more resilient surface film at the workpiece.

Benefits:

- High EP performance
- Excellent lubricity
- Thicker surface film
- Non staining formulation

Applications:

Where a non-vegetable based spraymist lubricant is required for use on exceptionally tough metals such as stainless steel, INOX SPRAY OIL is the ideal choice. It may also be used for cold heading, blanking and piercing operations, and is suitable for use with both ferrous and non-ferrous metals.

Typical Test Data:

Appearance	Dark amber liquid
Specific Gravity @ 20°C	0.902
Kinematic Viscosity @ 40°C (cSt)	60.41
Kinematic Viscosity @ 100°C (cSt)	8.49
Viscosity Index	112
Flash Point (COC °C)	240
Copper Corrosion	Class 1b

Health & Safety:

Please refer to the relevant health and safety data sheet, a copy of which is freely available to all of our customers.

Availability:

KR SAW CUT INOX SPRAY OIL is available in bulk road tanker deliveries, 205 litre barrels and 25 litre drums.
